Subject: Deficient Amended Notice of Intention to Conduct Exploration Operations, Magnum Minerals, San Rafael (Green River) Project, E0150078, Task 1858, Emery County, Utah

Dear Mr. Carden:

On June 26, 2007, the Division received an amendment to the referenced Notice of Intention to Conduct Exploration (NOI. Please re-submit the amendment and address the following items:

1. Please include form MR-REV-SMO/EXP signed by an officer of Magnum Minerals. A copy of this form is enclosed, and it is also available on the Division's web site at <http://www.ogm.utah.gov/minerals/MINERALSFORMS.htm>.
2. The NOI you previously submitted needs to be updated with replacement pages. A copy of the approved NOI was previously mailed to you.

The Division, in cooperation with the BLM, has determined the surety amount does not need to be increased. Although the amendment includes an increase in the acreage to be disturbed, the original surety amount included enough money for this additional area.

Please keep in mind the requirements in the Division's original approval concerning plugging of drill holes. You may not drill more than 10 holes before plugging is inspected by the Division or the BLM or you submit a signed report to the Division stating that the group of holes has been drilled and detailing drilling conditions and plugging techniques used.

For reporting purposes, the Division has developed the enclosed form titled "Drill Hole Abandonment Report for Bond Release." We suggest that you use this form as holes are plugged.
